

What is Autobrite?

AUTOBRITE is a unique floor cleaner and restorer which cleans effectively and simultaneously replenishes the floor surface with acrylic polish. It is designed for damp-mopping and autoscrubbing, and will leave the floor clean and ready for buffing to a very high finish. Alternatively, it may be used as a quick acting spray-buff solution.

Key Benefits

- ✓ AUTOBRITE is a convenient, two-in-one product that polishes and cleans in one operation.
- ✓ If used regularly, AUTOBRITE will create a beautiful, glossy film of floor polish.

How Does It Work?

AUTOBRITE removes all types of routine floor soilage.

It works in a two-stage cleaning mechanism:

1. Attack of soilage by detergent compounds which emulsify and remove it from the floor.
2. Preferential adherence to the floor by the polish components which form a protective film when the floor dries.

For Use On...

AUTOBRITE is used for cleaning vinyl, timber, terrazzo, quarry and ceramic-tile floors. It is ideal for slow to medium speed buffing but is not intended for ultra-high speed buffing (greater than 1200 rpm).

Technical Data

Composition

AUTOBRITE contains solvents, surfactants, builders and buffers together with polish resins and polyethylene and acrylic polymers.

Properties

COLOUR – Milky off-white liquid
ODOUR – Negligible
pH = 10.6 ± 0.2
FOAM – Low foam level, foam is unstable

Environmental Care

AUTOBRITE conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. AUTOBRITE is non-flammable, phosphate-free and biodegradable. AUTOBRITE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996

SAI Certificate No.: QEC7358

Application

➤ Damp-mopping and autoscrubbing

Dilute 1 part AUTOBRITE with 40 to 80 parts water. Scrub the floor clean. When it has dried, buff to a high shine with a buffing machine at 200-1200rpm.

➤ Spray-buffing

Dilute 1 part AUTOBRITE with from 15 to 50 parts of water (depending on soilage level and desired gloss of finish). Spray this solution lightly over a square metre of floor then buff this area till it is dry. Continue with the next area until the whole floor is clean. Finally, dust-mop the floor to collect the dust and dirt left along the edges. Buffing will produce a hard wearing, shiny surface.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
