

## What is Fabric Softener?

FABRIC SOFTENER improves the feel of washed fabrics by imparting a softness and bulkiness to the fibres and helps to neutralise alkaline residues. Ideal for both laundry and upholstery fabrics.

## How Does It Work?

FABRIC SOFTENER is a perfumed blue liquid that improves the feel or handle of fabrics and upholstery by imparting a distinct softness and bulkiness to the fibres. Wool, cotton, polyester blends and all other fabrics are suitable for rinsing with FABRIC SOFTENER. It helps eliminate static cling, drying times are reduced and it adds a pleasant fragrance and revitalises the brightness of coloured fabrics. Another benefit is the prevention of accelerated soiling due to adhesion of solid particles when static cling is present.

## For Use On...

### -Laundry

FABRIC SOFTENER is added to the final rinse water in washing machines. FABRIC SOFTENER is ideal for use in all industrial, commercial and household laundry operations and is suitable for all Australian conditions. It stops the tendency of synthetic garments from clinging to the skin, especially after tumble-drying and stops problems caused by lint in the tumble-dryer.

### -Upholstery

FABRIC SOFTENER is the ideal partner to CITRUS EXTRA. Once the upholstery has been pre-sprayed with CITRUS EXTRA, it can be extracted with FABRIC SOFTENER.

## Technical Data

### Composition

FABRIC SOFTENER is based on dimethyl ditallow ammonium salts dissolved in water with solubilisers, perfume, optical brightener and blue colour.

### Properties

COLOUR – Blue viscous creamy liquid  
ODOUR – Rose perfume  
pH = 4 – 5

## Environmental Care

FABRIC SOFTENER conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. FABRIC SOFTENER is non-flammable and phosphate-free. FABRIC SOFTENER containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

## Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996

SAI Certificate No.: QEC7358

## Application

### Laundry:

- Add the correct amount of FABRIC SOFTENER to the water as the final deep-rinse stage of the wash begins:  
Top Loading Automatics:..... 40 mls  
Twin Tubs: ..... 30 mls  
Hand Rinse:..... 10 mls - 20 mls  
Commercial Machines:..... 3 to 5 ml per kg of wash load with rinse water at 30 to 40°C.
- Never pour FABRIC SOFTENER directly onto clothes.
- It is best to pre-mix the FABRIC SOFTENER with some water to aid mixing.
- Avoid mixing bleach or any other products in the same rinse as FABRIC SOFTENER.
- Do not use FABRIC SOFTENER if the water supply is heavily discoloured.

### Upholstery:

- Dilute FABRIC SOFTENER to 1:50 parts water.
- Pre-test solution on fabric to ensure dyes are colourfast.
- Pre-spray the upholstery fabric with CITRUS EXTRA solution, then extract with FABRIC SOFTENER solution.
- After each wet pass, make a dry pass.
- Dry the fabric with a hair dryer or air blower.

Available in: 5L, 20L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
