FRESHAIRE

Odour Neutraliser

Product Data Sheet | Product Code: FRI | Issued: March 27, 2026

What is Freshaire?

A strong deodoriser with a unique four-way action to neutralise problem odours. FRESHAIRE attacks and neutralises odours, as well as leaving a pleasant reodorant perfume.

Key Benefits

- ✓ Appealing perfume
- ✓ Biodegradable detergent
- ✓ Excellent for controlling odour problems

How Does It Work?

FRESHAIRE is a strong deodoriser with a formula that has a unique four-way action:

- Remove odour-causing soils
- Anti-bacterial to remove the bacteria that produce odours
- Perfumed to reodorise the air
- Odour-neutraliser to attack and neutralise the molecules in the air that cause offensive odours.

For Use On…

FRESHAIRE removes offensive odours from hard surfaces, carpets, clothing, furnishings and upholstery. It is very useful in nursing homes, hospitals, laundries, toilets, rubbish dumpers, garbage chutes, trucks, kennels, animal pens, and any other places where offensive odours are a problem.

Technical Data

Composition

FRESHAIRE is formulated with biodegradable surfactants, quaternary ammonium compound, special odour-neutralisers, appealing perfume selected for its lingering capacity, and is water-based.

Properties

COLOUR – Deep green liquid
ODOUR – Perfumed
pH = 4.6 – 7.5
FOAM – Moderate foam level

Environmental Care

FRESHAIRE conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. FRESHAIRE is non-flammable, phosphate-free and biodegradable. FRESHAIRE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Colour Coding

Product identification is made easy with the Agar Colour Coding system. We have 11 different categories of product that are identified by colour and number. The product itself has this colour. Also, the colour and number are shown:

1. On the bottle label as supplied.
2. On the matching Dispenser Spray Bottle.
3. On the product chart for Colour Coded Cleaning

This system has benefits of reducing the chance of using the wrong product, making compliance and staff training easy, showing that the correct products are being used and providing information about usage, dilution and first aid.

Product	Code Colour	Code Number	Type
FRESHAIRE	Dark Green	6	Air Freshener

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".
First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

For general deodorising in hospitals, nursing homes and laundries dilute to 1 in 30 with water and spray on sources of odour, such as soiled linen, napkins, urine, vomit, decomposing food, garbage, etc. after removing the bulk of the soilage. Bedpans may be sprayed before and after use.

To identify sources of odour in nursing homes, a UV lamp is very useful. Darken the room and then shine the UV lamp on furnishings, walls and floors. Proteinaceous stains will show up. Once located, such stains should be scrubbed off with a solution of FRESHAIRE. U-REMOVE is also good for treating urine stains.

For carpets dilute to 1 in 10 parts water and spray onto source of odour after first extracting clean to remove as much of the soilage as possible. Do not rinse out. For extreme odours, 1 in 5 FRESHAIRE may be used.

In the laundry, FRESHAIRE may be used as a pre-soaker at the rate of 10ml per 10kg of dry-weight laundry.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Disposal Information

1. Used solutions -

Used Solutions of FRESHAIRE should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).
If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. FRESHAIRE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L
